

Fabricated Rebars

Our fabricated rebar is produced from our rebars to the customer's specific needs. We offer our clients the ability to do take-offs of structural drawings and quick delivery of the material required

Among the advantages that it offers, we have:

- Acceleration of the construction process
- Eliminate the waste of materials
- They allow for a better control of the inputs of the project, avoiding unnecessary expenses
- The save time and labor

Ranges of the Product:

Diameter*: 9.525 mm (3/8") to 35 mm (1-3/8")

Grades: GR-40, GR-60

Shapes:

Our automatic bending and cut-to-length machines are capable of producing a great number of shapes with a high degree of complexity

The more commonly used forms are: squares, rounds, rods, abutments for foundation, among others
